- Portuguese (Native) and English (Advanced) speaker.

## Profile

Autodidact, curious and lover of challenges that requires my creativity, logic and knowledge to find the best solution.

My 7 years of experience as software engineer brought me solid knowledges of OOP languages, relational databases, microservices architecture, full stack and mobile development (Android/iOS).

I've worked on the design and development of critical systems, from the proof of concept to a stable and reliable services architecture.
